**Intellectual Property Rights**  
Organized by  
**IQAC, Department of Physics & Department of Library**

**Workshop Objective**

Intellectual property refers to creations of the mind, inventions, literary and artistic works, and symbols, names and images used in commerce. Industrial property and copyright are two categories of Intellectual Property. There are several reasons to protect and promote intellectual property rights and patents. The intellectual property system helps strike a balance between the interests of innovators and the public interest, providing an environment in which creativity and invention can flourish, for the benefit of all. Patents provide incentives to individuals by recognizing their creativity and offering the possibility of material reward for their marketable inventions. These incentives encourage innovation, which in turn enhances the quality of human life. Objectives of IPR are to bring out the awareness and relevance of this approach and to bring out the exposure of benefit of getting patents and intellectual property rights.

**Webinar Organized for**

All UG PG Student, Researcher, Teaching-Nonteaching  
Staff and all the stakeholders of the society
